APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 29265, Certificate 10108, is issued subject to the terms and conditions imposed in said Permit 29265, Certificate 10108, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 57248, Certificate 15172; 57249, Certificate 15173 and Temporary Permit 67919-T shall not exceed 516.46 acre-feet annually.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued as a supplemental right to Carson River.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **October 9, 2002** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.3261 cubic feet per second, but not to exceed 200 acre-feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

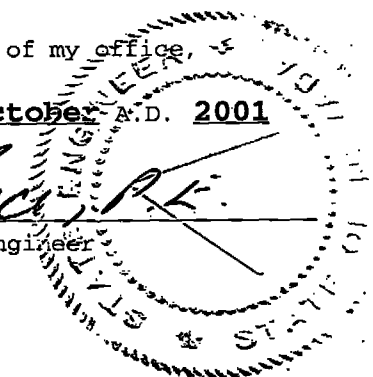

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

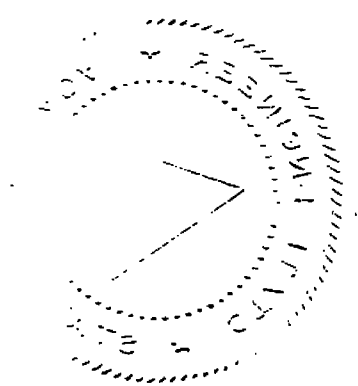

my hand and the seal of my office,

Comments:

The purpose of this application is to change the identified portion of Permit 29265 / Certificate 10108 from its current place of use to the golf course at Genoa Lakes. This change is necessary to facilitate the irrigation of the golf course through the remainder of the irrigation season due to the golf course owner's inability to rely on its primary source, the Carson River. The Carson River, in this reach, is currently experiencing one of the largest draughts in recorded history rendering the source insufficient to meet the allowed duty under the golf course owner's surface water rights.

The Applicant, Settelmeyer Ranches, Inc., has used these rights within the existing place of use to irrigate its fields on one occasion during this season. The Applicant estimates that this single application utilized 0.5 feet of water from the allowed duty of 4.0 acre-feet per acre.
